

To Whom It May Concern

CALIFORNIA PROPOSITION 65 DECLARATION

***This statement applies to our entire range of glue/glycerine gasket paper materials
branded Flexoid®, Sizoid®, Oakenstrong®, Firefly® and all other brand names.***

Jointine Products (Lincoln) Limited is a leading global manufacturer of cellulose paper gasket material, impregnated in a glue/glycerine mix.

Formaldehyde is used during the manufacture of our paper, and although the chemical is not intended to be released from the finished article, it is an item of concern under Proposition 65. For that reason, we declare that the materials produced by Jointine Products (Lincoln) Ltd may contain a chemical known to the state of California to cause cancer and birth defects or other reproductive harm according to the California Safe Drinking and Toxic Enforcement Act (PROPOSITION 65).

We cannot test for every chemical listed under Proposition 65, but we believe we have addressed the primary concern. Furthermore, we have never recommended our range of papers as suitable for potable water supplies.

We also recommend that you reach your own evaluations, particularly in context with REACH (EC1907/2006).

Mrs Jane Smith
Managing Director
